

The following is a summary of items submitted as a March 2010 monthly update.

Northeast Area

- MW-39 installation completed to 300 feet bgs. All groundwater samples "ND" for site VOCs.
- Access agreement for MW-40 and MW-41 still being negotiated.
- First round of surface water monitoring completed for locations SW-3A, SW-6 and SFM-7. The results for SW-3A and SW-6 were consistent with historical sample results with site VOCs detected but less than the Surface Water Screening Values. SFM-7 sample was "ND" for site VOCs.
- Second round of surface water monitoring planned for April 2010.
- Interim Measures Work Plan under development. Estimated submittal in late March to early April 2010.

Community Involvement

- Community meeting proposed for timeframe between submittal of Interim Measures Work Plan and installation of system.

EPA/DHEC/OC Meeting on March 12, 2010

EPA/DHEC requested the following at the meeting:

- Hardcopy of repository documents at the main library. Electronic copy will be distributed by the main library to the satellite locations.
- Leaving fact sheet at local fire station.
- Uploading site photos on website.
- Keep EPA/DHEC community involvement staff updated. Include Matt Robbins w/EPA on emails.
- Update history in CIP.
- Change community activities summary section in CIP to community technical activities summary.
- List contaminants in CIP and include ATSDR Tox Files.
- Matt Robbins with EPA requested copy of fact sheet.
