

Tasks Completed During Reporting Period

The following activities associated with the RFI and IM work at the subject facility were conducted between May 1-31, 2017.

- Maintained operation of the ICM system and conducted performance monitoring, including effluent sampling for VOC analysis, quarterly water level measurements, and daily system flow rate measurements.
- Completion of the new off-site bedrock wells on May 12, 2017.
- Submittal of the May 2017 off-site monitoring and residential well sampling notification letters to property owners on May 1, 2017.
- Submittal of the revised 30-year financial assurance cost estimate in May 2017, which was approved by EPA.
- Conducted the May 2017 quarterly groundwater monitoring event during the week of May 22-26, 2017.
- The groundwater treatment system was down for approximately 3 days in May 2017 without alarm system notification. Groundwater was under artesian conditions during this time and discharged from the weep hole in MW-41 due to a loose fitting; however, the issue was immediately resolved upon notification.
