

Tasks Completed During Reporting Period

The following activities associated with the RFI and IM work at the subject facility were conducted between November 1-30, 2021.

- Maintained operation of the ICM system and conducted performance monitoring, including effluent sampling for VOC analysis, quarterly water level measurements, and daily system flow rate measurements.
- Conducted the annual groundwater and surface water sampling event during the week of November 8-12, 2021.
- Submitted the *Q3 2021 Interim Corrective Measures Performance Monitoring Report*.

Difficulties Encountered During Reporting Period

No difficulties were encountered during the reporting period.

Summary of Contacts with Local (Community or Public) or Regulatory Groups

No interactions with the public or with EPA/DHEC occurred during this reporting period.

Projected Work for Next Reporting Period

Owens Corning's plans for the next reporting period of December 1-31, 2021 include:

- Continue operation of the ICM system and conduct required quarterly performance monitoring.
- Continue correspondence with off-site property owner and tenant regarding access to install bedrock well on property.
- Preparation of Tech Memo in support of proposed off-site bedrock well location. Tech Memo will be submitted within 30 days after property access has been obtained to install off-site bedrock well.
- Submit the residential and off-site monitoring well results letters to the property owners for the November 2021 sampling event.
