RE: Owens Corning - Quarterly Samples

Dear Tamara Berryman:

Order No: 1102F21

Analytical Environmental Services, Inc. received 27 samples on Februarv 18, 2011 8:00 am for the analyses presented in following report.

No problems were encountered during the analyses. Additionally, all results for the associated Quality Control samples were within EPA and/or AES established limits. Any discrepancies associated with the analyses contained herein will be noted and submitted in the form of a project Case Narrative.

AES' certifications are as follows:

-NELAC/Florida Certification number E87582 for analysis of Environmental Water, soil/hazardous waste, and Drinking Water Microbiology, effective 07/01/10-06/30/11. -AIHA Certification ID #100671 for Industrial Hygiene samples (Organics, Inorganics), Environmental Lead (Paint, Soil, Dust Wipes, Air), and Environmental Microbiology (Fungal) effective until 09/01/11.

These results relate only to the items tested. This report may only be reproduced in full.

If you have any questions regarding these test results, please feel free to call.

**Case Narrative** 

Sample Receiving Nonconformance:

The vials received for Sample 1102F21-022 were labeled as "MW-42 Z2" with a collection date & time: 2/14/11 16:45. The sample was listed on the COC as "MW-41 Z2".

2/18/2011 1:11 PM Per Dan McCloy, via email, sample should be reported as "MW-41 Z2".
