

Tasks Completed During Reporting Period

The following activities associated with the RFI and IM work at the subject facility were conducted between August 21 and September 17, 2014.

- Maintained operation of the ICM system and conducted performance monitoring, including effluent sampling for VOC analysis, quarterly water level measurements, and daily system flow rate measurements.
- Completed the August 2014 quarterly groundwater monitoring event during the week of August 25-29, 2014.
- Submitted the *Q2 2014 – Interim Corrective Measures Performance Monitoring Report* on August 28, 2014.

Difficulties Encountered During Reporting Period

No difficulties were encountered during this reporting period.

Summary of Contacts with Local (Community or Public) or Regulatory Groups

Owens Corning received a monitoring well approval letter from DHEC dated August 13, 2014 in reference to the RFI Technical Memorandum and RFI Work Plan submitted on June 2, 2014. In these documents, Owens Corning agreed to install one additional monitoring well between wells MW-41 and MW-43. However, prior to proceeding with this work, Owens Corning requested to meet with EPA to discuss two issues. Therefore, this monitoring well approval letter appears premature at this time. No other interactions with the public or with EPA/DHEC occurred during this reporting period.

Projected Work for Next Reporting Period

Owens Corning's plans for the next reporting period of September 18 through October 15, 2014 include:

- Continue operation of the ICM system and conduct required performance monitoring.
- Owens Corning anticipates addressing comments following EPA's review and comments on the RFI Technical Memorandum and RFI Work Plan submitted on June 2, 2014.
- Continue preparation of the *Q3 2014 – Interim Corrective Measures Performance Monitoring Report*.
